Since 1945 the Howard Soil Conservation District has helped citizens of Howard County with soil conservation and water quality protection through a variety of programs that provide technical guidance, education, outreach, and financial assistance. The Howard SCD is a political subdivision of state government, but provides technical support and resources from local, state, and federal agencies. By consolidating resources from these three levels of government, Howard SCD is able to provide our clients with comprehensive assistance and access to a variety of conservation funding opportunities.
